# Green Space Tips

• Rolling trash cans are provided for the disposal of waste during green space events, and it is advisable to bring your own large trash bags.

• Allocate sufficient time for cleanup to ensure that the subsequent scheduled event is not affected.

• The pool operates under a Swim At Your Own Risk (SAYOR) policy, and it may be prudent to hire a lifeguard if deemed necessary.

• If you are using a bounce house, refrain from connecting more than one air compressor to a single outlet, as this could cause the circuit breaker to trip. There are several outlets available on different circuit breakers, and the faceplate of each receptacle indicates its corresponding circuit breaker number. Ensure you are aware of the number of extension cords required.

• All area lights and pool lights are equipped with photocells and will automatically activate at dusk.

• Confirm with Sterling that your account is current and in good standing before requesting to reserve a time.

• Check in advance that your magnetic access key functions properly on the main gate and the two pool gates. If your Sterling account is not in good standing, your magnetic cards may be deactivated and will not operate.

• Confirm with Sterling that the Swim At Your Own Risk (SAYOR) waiver is on file.

• Avoid parking in the fire zone (red curb) directly in front of the pool, as this area marks the location of the fire hydrant, and LaPorte police have previously issued citations for parking violations in this zone.
